i-Cab - Driver's cab

Multi-function seat with air suspension, making driving more comfortable.

Double seats and foldable berth for the co-driver.

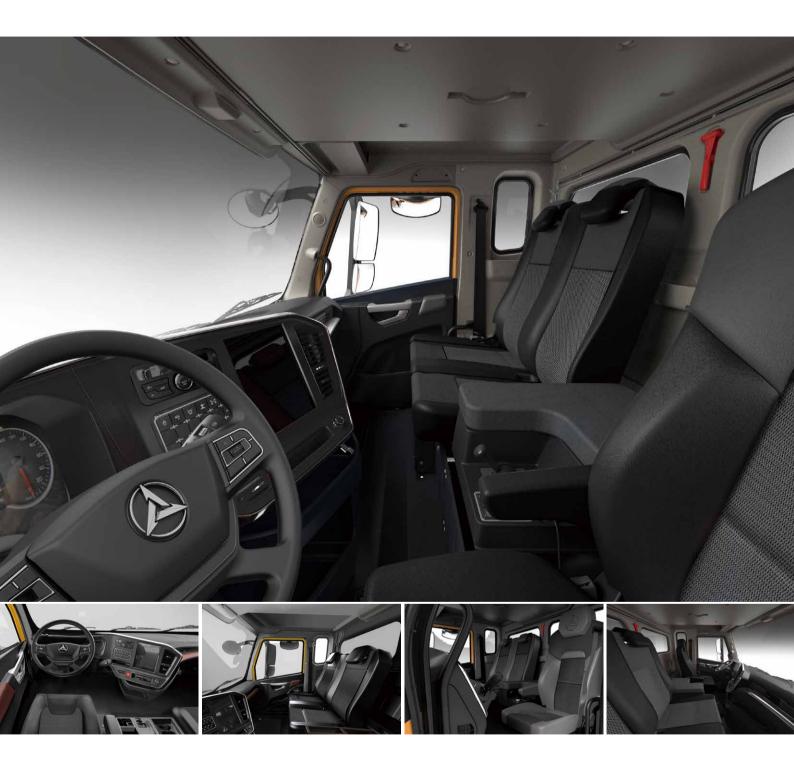

10.1-inch touch screen integrated with back-up image and multi-media.

 ${\bf Electric\ rearview\ mirror\ with\ electric\ heating, ensuring\ good\ field\ of\ view\ in\ foul\ weather.}$

Adjustable high-brightness LED headlamps/fog lamps, providing clear vision at night.

Full-automatic HVAC, able to automatically adjust indoor temperature as demanded.

SPECIFICATION

i-Cab - Operator's cab

Seat widened by 480mm, and leg room increased by 30%.

Cab tiltable by 0-20°, relieving cervical fatigue during large-angle and long-boom operations.

Adjustable seat with maximum inclination of 140° , allowing the operator to lie flat and rest after work Electric seat linked with armrest box, enabling multi-dimensional adjustment for enhanced comfort. Electronic control joysticks, making operation easier.

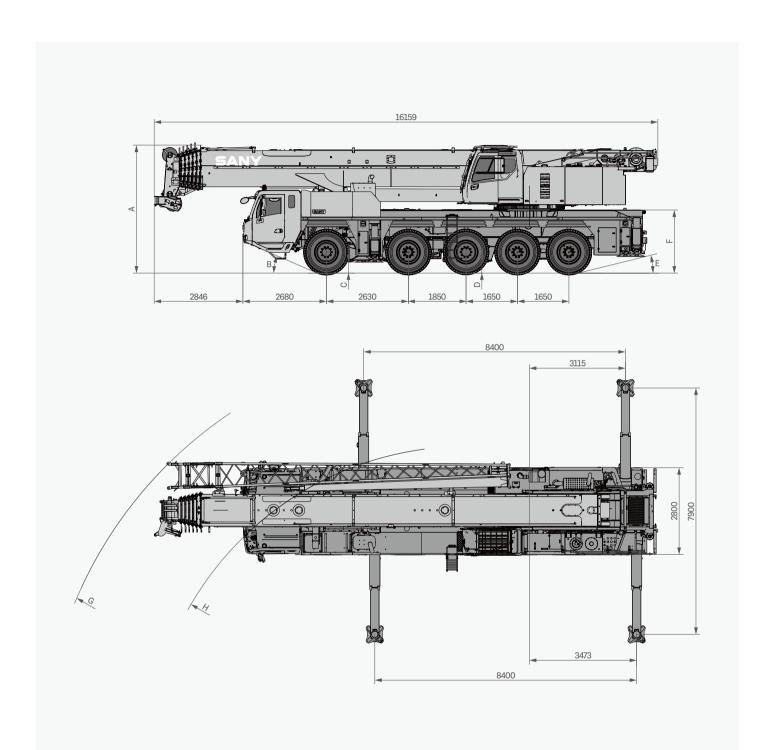

45° tilted silicone button panel, easy to reach and operate.

70° openable front window convenient for ventilation and escape; in compliance with CE standards. Sliding door, more convenient for getting on/off the cab and opening/closing the door.

Full-automatic HVAC, able to automatically adjust indoor temperature as demanded.

Counterweight Combinations

Crane Introduction

Driver's cab

Three seats with a folding berth. It's soundproofing performance meets the standard of heavy duty trucks. Air suspension seat features shock absorption, back adjustment, lumbar support and other ergonomic designs. Virtual LCD instrument and 12.1"console screen integrate auto control of air conditioning. Indoor temperature can be adjusted precisely and smoothly. LED headlights, electrically heated rear-view mirrors, multifunction steering wheel. The multi-media equipment can be controlled by the buttons integrated in the steering wheel.

:8: **Carrier frame**

■ The frame is a box-shape structure welded by high-strength steel plates with strong bearing capacity.

Engine

- Model: DF Cummins QSZ13-C525-30 inline six cylinder, water-cooling turbocharged inter-cooling diesel.
- Emission standard: EU Stage IIIA.
- Fuel reservoir capacity: 600L.

Transmission

FAST 12-speed AT with hydraulic retarder, adaptable to driving down long slope.

Axle

 All-axle steering with disc brakes, driven by axles 2, 4 and 5, hydraulic power steering system of linkage feedback for axles 1 and 2, and electro-hydraulic control steering for axles 3, 4 and 5; the speed control assistance and optional special steering mode facilitate the control and steering.

□ Suspension system

All axles equipped with hydro-pneumatic suspension with hydraulic lockout, height adjustable up by 190mm and down by 100mm. Variable modes incl. rigid lockout, auto leveling, whole machine rise & lower, single point rise & lower. Ride comfort and vehicle lateral stability are ensured regardless of any rough terrains.

□ Steering

- It is equipped with servo power steering, dual-circuit system hydraulic steering with emergency steering pump.
- Six types of steering modes: 1. on-road driving mode (default mode): 2. allwheel steering mode; 3. crab mode; 4. Reduced swingout steering mode; 5. independent rear axle steering mode; 6. rear axle locking steering mode.

Tires

Ten radial tires sized 14.00R25.

1-1 Wheel formula

■ 10×6.

(C) Brake

- Parking brake: actuated by the accumulator on the second to fifth axles.
- Service brake: all wheels use air servo brakes, dual-circuit brake system, and all wheels are equipped with disc brakes.
- Assist brake: the engine is equipped with engine brake, hydraulic retarder brake and exhaust brake, which can reduce the wear of brake components and save the cost.

Coutrigger

H type outriggers spanning 8.4m×7.9m, full hydraulic telescoping, auto leveling.

Electrical system

- CAN bus system, 24V DC power supply, 2 sets of battery packs, 180Ah each. It can cut off the power supply of carrier.
- The chassis adopts CAN bus system; multi-functional integrated display system; LCD, the contrast can be adjusted.

Crane Introduction

Operator's cab

• Curved track sliding door, foldable front step and electric side step. The seat and armrest can be adjusted steplessly in multi ways electrically. Auto air conditioning system gives out airflow from various vents once pressing the virtual key. Windshield wiper covers large area, ensuing clear vision in heavy rains. Double 10.1" frameless displays of all new UI is equipped. Operation is realized via touchscreen and buttons.

Engine

- Model: DF Cummins QSB6.7-C260 inline six cylinder, water-cooling, turbocharged inter-cooling diesel.
- Emission standard: EU Stage IIIA.
- Fuel reservoir capacity: 265L.

Boom & telescoping system

- Main boom: seven-section 74.8m, made of high-strength welded structural steel, oval shape,
- Jib: standard 18m, with optional extension up to 26m. 0°, 15°, 30° mechanical adjustment
- Independent hydraulic telescoping, full extending and retracting time 660s, which is simple, efficient, safe and reliable.

| Hoist

 The main hoist adopts electro proportional variable motor, featuring stability and inching mobility. Main wire rope diameter 22mm, length 280m.

Luffing system

Passive luffing down, more energy-efficient. Single-cylinder with front hinge arranged, the force of the boom is optimized. The electric proportional control balance valve is adopted.

Slewing

 Electro proportional variable piston oil pump applied, 360° slewing, 0~1.5r/ min. The electric proportional closed hydraulic circuit and the electric proportional pedal can realize emergency braking.

Counterweight

Movable counterweight totaling 42t, traveling with 20.5t counterweight allowed with well distributed axle load, prolonging service life of axles. CW assembly and disassembly controlled by remote device.

| Hydraulics

- With the use of high-quality variable piston main oil pump, slewing pump, main valve, winch motor, balance valve and other key hydraulic components, it ensures that the hydraulic system is stable and reliable; with accurate parameter matching, the operation performance is superior.
- With electric proportional variable displacement piston pump to adjust the displacement of the oil pump in real time through the change of the opening degree of the joystick, it realizes high-precision flow control without energy
- With self-developed double-pump flow confluence / shunt main valve, higher efficiency of single motion and better control of combined motions are
- Passive luffing down with hydraulic compensation ensures excellent inching motion and stability.
- Boom telescopes via single cylinder pin mechanism.

Control system

 Electronic control of the crane through the SYMC load moment indicator independently developed by Sany. Crane motion is adjusted by hydraulic pump; and the operation speed is adjusted by engine speed.

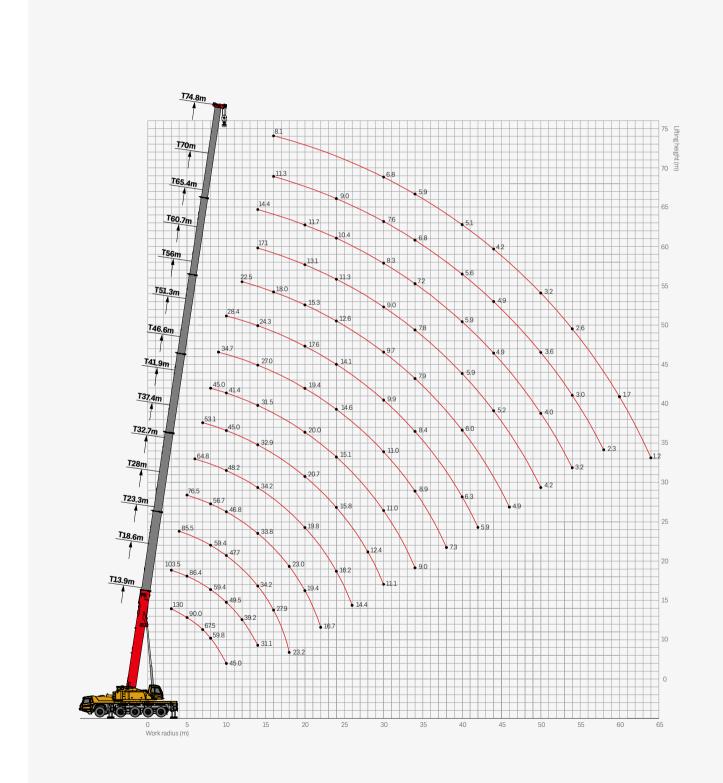

Safety equipment

- LMI: using the analytical mechanics method, the LMI calculation system based on the hoisting mechanics model is built. The rated load accuracy is ± 5% by online empty-load calibration, and the hoisting operation is fully protected. When overloading, the system gives auto alarm for 100% safety.
- The hydraulic system is equipped with hydraulic balance valve, relief valve and two-way hydraulic lock to achieve system reliability.
- The main and auxiliary hoists are equipped with three-circle protectors to prevent the wire rope from over-hoisting down.
- · Height limit switches are arranged at boom head and jib head to prevent the wire rope from over-hoisting up.
- An anemometer is installed at boom head to detect whether the wind speed exceeds the allowable range of operation.

Optional equipment at extra fees

- 125t hook block
- 100t hook block
- 32t hook block
- Boom extension 8m
- Auxiliary winch
- Boom tip camera
- Tri-color warning lights of Singapore standard
- Spark arrester
- Air intake shutoff valve
- Fan in operator's cab
- 445/95R25 tires
- Spare tire bracket
- Outrigger pads
