

# **Articulating Boom Lift GTZZ-25J**

# **Specification**

\*Lift capacity:230KG \*Width stowed:2.49m \*Working height:26.9m

# **Features**

- \*Easy to operation, good stability, no impact
- \*Flexible boom, more practical and complex and nurturing work space
- \*Good gradeability, more radius and the whole machine stable

Model GTZZ-25J

#### **Performance**

Working height maximum 26.9m

Platform height maximum 24.9m

Horizontal height maximum 16m

Up and over clearance max. 10.5m

Length -stowed[D] 11.28m

Width-stowed[E] 2.49m

Height-stowed[C] 2.86m

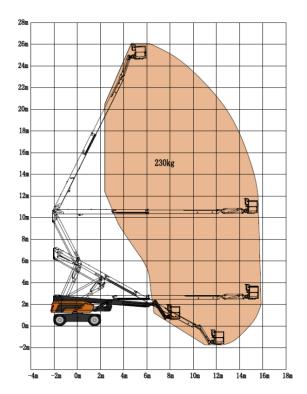

Platform size(L×W)[A\*B] 1.83\*0.76m\*1.1m

Wheel base[F] 3.05m Ground clearance[G] 0.38m

#### **Dimension**

2 Lift capacity 4.85km/h Max platform occupancy 1.1km/h Drive speed-stowed(max) 45% Drive speed-raised(max) 2.5m Gradeability-stowed 5.98m Turning radius-inside 5° Turning radius-outside 385/65-24 Working slope maximum

# Power

Tyre

Power source
Drive & steering

Cummins 4WD\*2WS

230kg

# Weight

#### 1.Chassis

- Wide chassis makes the lower part of the Equipment which can bear the load balance to enhance stability.
- ♦16/70/20 Solid Tyre, it can keep stable not only in a variety of complex conditions, but also enhance the ground friction, then the equipment is more stable in operation, and climbing easier.
- ♦ The steering system adopts double oil cylinder and Hydra steering system, with 40Cr steering linkage to ensure the same direction.
- ♦ Floating leveling device will start automatically when the device encountered under the condition of uneven ground, to ensure the balance of equipment with slope of 6 degrees, then strengthen the safety and adaptability.

#### 2.Rotation table

- ♦360°continuous rotation,with 50Cr rotary support
- ♦ Emergency safety pump. The operator can use emergency safety pump to fall safely, when the equipment is working at high altitude which can not be down.
- ◇Constant pressure pump of Danfoss USA or Rexroth German, it avoid oil leakage caused by gear pump damage in long -term construction
- ♦The electric control system of centralized electric control box is used to ensure the safety of equipment operation
- ♦ Ground control console and platform control console, the former has a large screen display, with self diagnostic screen, without connected to the computer, then customers can easily understand the calibration status of equipment and parameters, which is convenient debugging and testing.
- ◇Controller of IFM Germany can enhance system stability
- ♦Turntable safety lock,to avoid the damage in the transport and maintenance of arm rotation
- ♦Glass fiber steel cover make the whole equipment nice and durable

#### 3.Boom

- ♦The boom structure adopts 70 high strength steel to ensure the safety of equipment construction
- ♦When the boom is extended, the side boom adopts a sleeve type pipe or line design, which is beautiful and convenient.
- ♦Germany imported IGUS chain, stable performance ,long life and never rust.

### 4.Platform

- ♦ Imported overweight sensor to ensure operator load safely in the construction
- ♦ Control system with three joystick to work easily in the multiple compound action
- ♦Foot pedal,handle is effective under pressing foot pedal
- ♦Self lock door to keep safe
- ♦Platform guardrails can rotate around 160 degrees to work conveniently
